

POR Program: Magellan (S'27)

20th Aug

Director/SM/PGM/CE on point: Teng Ling Foong/Ho Lip Kiat/Silvester Mali/ John Tee

Intent	High leverage to meet time to market in S'27 with low investment
Scope	Leverage Watt LE / Marconi Hi mech + CISS *Speed: 25/20ppm (PDL: 25/19ppm) Support customer replaceable PHA and NOA-F Support new Warranty Page life goal of 80k pages
SKU	2 (Hi + Hi PDL) -PaaS
Product	*Reddington ID with size increase for tank. No change to Marconi-HI ADF *EPS foam packaging EPEAT3 and LOT4 requirement, Blue Angel for PDL SKU Input Tray, output tray changes to align with tank protrusion Size optimization 4.3" CGD
Platform	4 tubes - leverage Sayan Sibstar tubes, new tube routing and integration Service station aerosol mgmt with spit platform changes due to tank Carriage dynamic and force model with tube and new weights Paperpath to support increased Page life Ink Maintenance Serviceable part (Service Center) - post 80k life
PHA & Supplies	SuperAmp PHA, NOA-F, Keyed bottles, Magi and Nessie Pigment inks, 140ml K Bottles (New) xx ml CMY bottles
IDS	New Make-break and FI connection, Leveraged LEBI ink-tank with increased size, keying and LOI One (1) SHAID New IDS startup algo and air mgmt
WS	Reuse Marconi Hi PDL New servicing and startup algo New PQ goals & depletion to meet page yield definition MISR
EE	Reuse Marconi Tux dASIC, Hannibal aASIC, Raccoon PSU Stingray Wi-fi module

Pen/NOA-F/Bottle:

Director/SM/PGM on Point: Vincent Ong/Peh Bee Ling/Lyn Tan
MTO Scope/Deliverables

R&D

- NGB Keyed bottles 6K Black, 6K CMY page yield.
Bottle size for CMY >8K
- Spill free reliability
- NOA F with metal foiled labyrinth and lid label, No change to click on push-push and TDF
- Reuse Superamp Si PHA
- Reuse Magi / Nessie ink (no ink reformulation)
- Reliability, WVTR, Air gain, flow rate and IDS characterization and modelling, including startup and NOA-F EOL
- Ink stability modeling (? Tank and impact to PQ?)
- Support for services/contractual
- NOA-F as service parts in warranty support
- Acumen 6 on Lid

Factory configuration

- Modify existing line SA 14 req'd for NOA-F
- Add Magi ink cart and Labelling tool in Orcus 5
- Assumes PHA + Dry FI + USG + push push are assembled in printer factory
- ISDO Capex: SA14 Line for NOA-F, Magi and Nessie ink cart and labelling tool in Orcus 5, Mold for 1 to 4 new keyed caps

Solution and Services (WIP)

Business Model:
Consumer, SMB, and Enterprise

Services:

- PaaS
- WorkFromHome/ Flexworker

Onboarding/ S&O path:

- Consumer/HPX path
- HP One path
- SMB Portal path
- ECP path

Solution:

- Scan solution
- SMB manageability
- Enterprise support: WJA, HPSM, JAM

Clients & Drivers:

- HPX,
- PSA, SUPD, UPD
- EasyStart, USS, UFD

Schedule	Q325	Q425	Q126	Q226	Q326	Q426	Q127	Q227	Q327	Q427
HW Checkpoint	Re-SI		DO	IL		DP	MC	VR	FCS

HW build	Imech	BB1	BB2	TR	LP1	LP2	MP1/PP	SOR		

Blue are new compared to Marconi-Hi; Orange is under investigation; *Accept scope

HP

Confidential

SI & COF

Strategic Intent

1. Protect Micro/ SMB segments and safeguard HP's trad ink/laser profit pool from going over to competitors.
2. Lead with LaserJet and flank with PDL in Medium and Enterprise. Win over Epson as CISS grows.
3. Grow CISS profitable share by playing in new segments.

High Level Dev Approach

- Highly Leverage Watt-LE mech Platform, Marconi-Hi Product (Reddington ID) and solutions
- Integrate CISS IDS, NOA-F and ink tanks
- New NGB keyed ink bottles
- Reuse SuperAmp PHA, Magi+Nessie Ink

Business Priority Matrix

CONSTRAIN (least flexible)	• Schedule, • SuperAmp PHA life at 65K
OPTIMIZE (some flexibility show in priority)	• Warranty Life of pages, 2 years • Thruput 25/20 (PDL) • Serviceability Maintenance Box) • SMB Solution • PaaS (schedule)
FLEXIBLE (most flexible)	• Host 12K-CMYK • Trade Page 6K
